

**DESCRIPTION**

**Mains Voltage (240v ) must only be installed by a licensed electrician and meet all local regulatory requirements. Ensure mains voltage is switched off.**

- A. Before installing, refer to diagram for the correct dimensions of the cable entry.
- B. Unscrew the mounting plate from the fixture.
- C. Push wire through rubber grommet and mark where to drill holes. Use suitable fixings provided to mount plate.
- D. Remove terminal box cover and connect to main power.
- E. Install GU10 bulb. (Not included).
- F. Screw fixture onto plate.
