

DESCRIPTION

1. Ensure mains are switched off.
2. Separate Ceiling Bracket **(1)** with Ceiling Cup **(3)**. Ensure Grub Screw **(4)** is loose.
3. Fix Ceiling Bracket **(1)** to ceiling with screws provided or your own.
4. Shorten cable **(5)** to required length and ensure cord grip inside Ceiling Cup **(3)** is in place.
5. Connect electrical cables with connector box provided.
6. Push Ceiling Cup **(3)** onto Ceiling Bracket **(1)** and align holes.
7. Screw in 2 fixing screws **(2)** to hold Ceiling Cup **(3)** to Ceiling Bracket **(1)**.
8. Never over tighten, its unnecessary and can cause damage.
9. Screw in your favourite globe ensuring not to go over recommended max wattage.*

*Lamps excluded

**Lamp Holder is purposely loose to ensure light bulb is straight in glass shade. Slight manual adjustment may be necessary.
